

The **Biomedical Research Center** (*Centro de Investigacións Biomédicas, CINBIO, Centro Singular de Investigación de Galicia 2016-2019*) (www.cinbio.es) is a multidisciplinary center that covers some of the main research areas in **Biomedicine**. It emerged to create a common infrastructure for biomedical experts from the University of Vigo (Spain), working on basic, applied and clinical research. Among the professionals involved, there are medical doctors, chemists, biologists, biostatistics and engineers. The Center facilitates the exchange of knowledge, resources and technology among the different groups but also with other health centers, universities, regional and local governments and the related industry.

CINBIO aims to become a key international contributor to biomedical research, and it is now in the process of promoting the incorporation of highly qualified researchers.

It is organized into five strategic research and three support areas. Each one includes several lines of research pursued by different groups from both the University of Vigo and partner hospitals, supervised by a coordinator who takes care of scientific and technical planning aspects.

- **CANCER**
- **INMUNITY AND INFLAMMATION**
- **NEUROSCIENCES**
- **BIOHEALTH AND ACTIVE AGEING**
- **OBESITY AND METABOLIC DISEASES**

Transversal areas: **BIostatistics / BIOinformatics / INNOVATION: NEW METHODS (preventive-diagnostic-therapy)**.

The Center implements the General Principles and Requirements of the European *Charter for Researchers* and the *Code of Conduct for the Recruitment of Researchers*, to guarantee the transparency, ensuring the equal treatment of all applicants.
